

THE TESTIMONY TAKEN.

EVIDENCE IN THE CASE OF THE SISTER OF THE SACRED HEART.

Madam Marie Bender, an Old Pupil, Tells How the Convent Was Conducted Over Sixty Years Ago—Is Called to Testify in the "American Language" at the School—A Quaint Story.

THE trial of the case of the State of Missouri vs. the Sisters of the Sacred Heart, against the Ladies of the Sacred Heart, expired by limitation in 1868. It is alleged that the institution is not devoted to the care and maintenance of orphans, as by the deed it should be, but is a seminary for the training of young ladies in the higher branches of education and for fitting them to meet the highest circles of society. The proceedings are quo warranto and the petition of the plaintiff asks that a receiver should be appointed to take charge of the property of the convent, a block of ground near each street and Chouteau avenue. The morning was principally occupied reading the pleadings and the documentary evidence which was submitted. The deed of John Mulvaney to the ladies was read and the facts of the deed and the conveyance. The articles of incorporation were put in evidence.

There were several witnesses summoned and among them Mr. Richard Dowling and Mr. Frederick E. Hillen, both nearly 90 years of age, Mr. Charles P. Chouteau, Mr. Francis S. Haydel, Mr. Austin Walsh, Mesdames Frances Alton, Mahony and Penhoff, Rev. Mother Prudens and Sister Mary.

When the trial began Judge Valliant, seeming to be somewhat in doubt about the exact character of the case, asked if both the cases as they are recited in the pleadings and passed upon them. Judge Madill said that the counsel did not. Each side admitted some facts, but it would be impossible to determine in advance the exact nature of the case. It would be necessary to go on with the trial and see what the facts were.

THE FIRST WITNESS. The first witness put upon the stand was Mr. Austin Walsh, President of the Catholic Orphans' Board, whose testimony was almost entirely devoted to the knowledge of the court that the Orphan's Board had been established in 1816, and that it had since that time been conducting its business in the care of orphans and children, both of whose parents are indigent.

Mr. Walsh testified to the fact that the Orphan's Board had been established in 1816, and that it had since that time been conducting its business in the care of orphans and children, both of whose parents are indigent.

Mr. Walsh testified to the fact that the Orphan's Board had been established in 1816, and that it had since that time been conducting its business in the care of orphans and children, both of whose parents are indigent.

Mr. Walsh testified to the fact that the Orphan's Board had been established in 1816, and that it had since that time been conducting its business in the care of orphans and children, both of whose parents are indigent.

THE DOCTORS' CONTEST.

Arrangements Performed by the Women's Humane Society Yesterday.

A special meeting of the Women's Humane Society was held on yesterday afternoon at their headquarters, 1728 Washington avenue, to make arrangements for the contest for the "most popular physician in St. Louis." In spite of the weather, there was a full attendance, and Mrs. Lucy A. Ellis (the originator of the scheme) presided.

One lady mentioned that the allopaths looked upon the homoeopaths as "irregulars" who were unworthy of entering the lists, and another remarked that a young homoeopathic student had sent a message to the society to the effect that the gold-headed cane would be awarded.

It was suggested that the society should hold out the contest privilege for a year, and that the contest should be held in the fall, at a time when the weather would be more favorable.

There was a lively discussion following as to the "relative merits" of the two schools, and the contest will be held as usual, at 4 o'clock Tuesday next, at 1728 Washington avenue, and all members are earnestly requested to be present.

LABOR NEWS.

D. M. Osborne & Co., Outgeneral Their Striking Employees—New Men Hired.

By Telegram to the Post-Dispatch. AUBURN, N. Y., February 16.—D. M. Osborne & Co., out-general their striking men yesterday morning, by hiring new men to do the work.

The new men came in on the New York Central train from the West. The trains from the West on the Central usually stop for a moment just west of the Southern Central crossing at Division street.

The strikers had picked there to watch the trains but the new men were already on the train at 4 o'clock, and went into the factory in a body. One of the rooms over the office has been fitted up for their use.

MARRIAGE ENGAGEMENTS.

GIRLS SHOULD SELECT SEVERAL YOUTHS TO STUDY.

How Lovers Should Behave During the Engagement Period—Unlucky Advice to Those Who Have Lost Their Interest in the World—How Girls Should Act Towards Their Lovers—Modesty Wins Before Everything Else.

From the London Telegraph. The two most fruitful causes of unfortunate marriages are, it is considered, engagements and false standards for estimating personal worth. Very often the former, and almost always the latter, results in matrimonial unhappiness, regret and even remorse.

It is suggested that girls should select several youths to study, and that they should not become too attached to any one of them until they are well acquainted with their characters and habits.

The age of chivalry is past, and the girl is very fortunate who can find one man whose devotion will survive a three years' probation. We are gravely told that the equality of the sexes; men are no longer seeking goddesses, but wives, and the perfect working of Ruskin's theory would involve the additional circumstance that each of a woman's suitors should be considered two women besides herself with a view to possible marriage.

Attempts to rationalize the process of "falling in love" can be successful only within very narrow limits. The reason that affection, from its very inception, idealizes its object, is not blind, but color blind. Every conceivable virtue is imputed to the adored one, who is so utterly unconscious of being the target for so many superlatives, or may be, with a will, an attitude of supreme indifference.

It is sometimes desirable to see life color de rose, but never when contemplating marriage. A touch of cynicism, which is not a virtue, will, however, it is doubtful if any of us have been wholly exempt from this mild form of lunacy. Scarcely from the cradle, we refuse to accept, upon the testimony of others, even such a plain, every day truth as that a man being ill-favored, and will not be content until we have discovered that the opposite sex contains at least one exception.

Young persons who have been properly bred and educated, especially where there are both sons and daughters in the family, are unlikely to imagine impossible virtues of one another. Girls just in society, who know young men only in their visiting hours, are especially liable to this illusion. Their imaginations are not so much as those of a young woman who has been in the society of a young man for some time.

MISSOURI LEGISLATURE.

This Morning's Session Brief and Unlucky—Speaker Russell's Bill.

By Telegram to the Post-Dispatch. FRANKLIN, Mo., February 16.—The House opened this morning with prayer by Representative Davis of Adair. About fifty members were absent. Mr. Fountain of Jasper presented a petition from the farmers of the State, praying for the repeal of the law which prohibits the sale of land in small lots.

The bill was read and referred to the committee on agriculture. The House then passed a resolution to the effect that the committee on agriculture should report on the bill by the next session.

AMONG THE BROKERS.

Fail in West Granite—Stocks Sold and Prices Obtained.

Mining stocks, while very active, generally exhibited their energy in rising rather than in falling, and several reached the lowest point touched this year.

West Granite was the stock most generally dealt in, and also led in the declining, falling in price more than any other property. The stock opened at 75, and after a sale of 400 shares at this figure dropped to 74, the transaction amounting to 800 shares; at this point a panic occurred and the price fell to 70, not more than 100 shares being sold during the decline. At 70, however, the friends of the stock made a sharp rally, and after taking over 2,000 shares, forced the price to 74, sales aggregating 1,000 shares were made at this figure. The bidding then was made at 74, and more were offered at 74, and the stock made a sharp rally, and after taking over 2,000 shares, forced the price to 74, sales aggregating 1,000 shares were made at this figure.

The stock then made a sharp rally, and after taking over 2,000 shares, forced the price to 74, sales aggregating 1,000 shares were made at this figure.

SCRATCHED 28 YEARS.

A Scaly, Itching, Skin Disease With Endless Suffering Cured by CUTICURA Remedies.

I had known of the CUTICURA REMEDIES twenty-eight years ago it would have saved me \$200.00 (two hundred dollars) and an immense amount of suffering. My disease (Psoriasis) commenced on my head in a spot not larger than a cent. It spread rapidly all over my body and got under my nails. The scales would drop off of me all the time, and my suffering was endless, and without relief. One thousand dollars would not tempt me to have this disease again. I am a poor man, but feel rich to be relieved of what some of the doctors said was leprosy, some called it psoriasis, and some called it scabies. I have now a clear skin and feel as well as I ever did. I have not used any other medicine since.
